Attachments: Olympic Oil sketch 2.25.15.pdf

The attached figure should help everyone decipher sample locations. The canal samples that Cordell collected are OA-SW-02-0225 and OA-SW-01-0225. I do not have those exact locations

Apologize for the rough sketch on PDF, but here is basically what we did yesterday.
And for the frozen brain syndrome and labeling the water sample from KP8 as KP9w.

Please send me boring/well logs when you have a minute. Also, do you have a sketch of where the borings/wells were completed that you can send me?
